

## Ecuaciones con Números que Faltan (J)

Halle el valor de cada incógnita.

$126 \div b = 7$

$q - 12 = 13$

$13 - m = 3$

$15 \times p = 120$

$8 + p = 27$

$x + 10 = 26$

$s - 1 = 16$

$y \times 10 = 10$

$f - 8 = 10$

$9 + g = 11$

$27 - s = 11$

$c + 20 = 36$

$24 - x = 6$

$m + 9 = 11$

$102 \div u = 6$

$j \div 16 = 4$

$60 \div p = 12$

$y \times 9 = 18$

$m - 14 = 10$

$x + 17 = 23$

$20 + f = 24$

$j - 13 = 2$

$z \div 16 = 5$

$12 - p = 8$

$v \div 9 = 17$

$x + 13 = 28$

$k \times 19 = 361$

$d - 13 = 11$

$j \times 13 = 104$

$y \times 9 = 72$

$16 + g = 36$

$6 + k = 12$

$23 - t = 8$

$q \div 12 = 12$

$n + 17 = 35$

$117 \div g = 13$

$29 - k = 19$

$j + 4 = 22$

$15 + n = 34$

$q \times 13 = 104$
